Projects

Weather App

- Created a weather forecasting app that provides real-time weather updates and forecasts using Weatherbit API.
- Employed JavaScript, HTML, CSS, and React for front-end development, resulting in a dynamic and visually appealing interface.

Scalping trade

- Developed a scalping trading system designed for rapid, high-frequency trades in financial markets.
- Used Python, Javascript, and Alpaca API to analyse market data and execute trades based on predefined strategies.
- Optimised trade execution speed and minimising risk.
